Our ears are a wonderful and fascinating part of our body. Just make sure you never explore your ears or nose by sticking objects inside them. No rocks, no beads, no sticks, or anything else please. It’s something curious kids often do . . . but it’s also dangerous. You could hurt your eardrums, and it’s no fun at all having to go to the doctor’s office so they can fish out an object that’s stuck in there.

So be sure to keep your ears happy, by keeping other objects out of them. This way they’ll keep working for you for years and years to come!
